

# We are celebrating 20 Years!

Spring Grove Nursery took root back in 1999, making 2019 our 20th year of growing trees! Milestones like this give us an opportunity to stop and pause a bit – reflecting on how we started, how we have grown, and what we envision for our next 20 years.

Just like the trees we grow; our story is rooted in history. After planting our business on a foundation of good “roots”, we have been able to “branch out” into a flourishing nursery. The trees, friends, and partners we have grown along the way have all helped us develop a vibrant “canopy” we are proud to stand under. We invite you to follow us this next year as we share an inside look at Spring Grove Nursery from the ground up!

To kick off our 20 Years & Growing Celebration, we have launched a new website and catalog. Our new website features an improved Photo Gallery with lots of great photos and info about our SGN Trees. We also re-vamped our blog which is now full of helpful resources and updates from the field. Our new printed catalog features expanded photos and tree descriptions about the selections we grow at the nursery. We hope these will be helpful tools in your tree selection process. Please take a look and let us know what you think!

As we spend this next year reflecting on the past and looking forward to our future, we still want to celebrate this 2019 season ahead! Once again, we have a fantastic crop of trees ready to harvest. We invite you to join us this season and experience what goes in to an SGN Tree here at the nursery. We look forward to celebrating and growing with you!

Your Growers,

*Jamie Thomas Becky Thomas*
