

ACER RUBRUM 'FRANK JR' PP16769

Redpointe® Red Maple

Height: 45'

Spread: 30'

Growth Rate: Medium

Shape: Broadly oval

Foliage: Dark green

Fall Color: Bright red

Flower: Red, small

Fruit: Samara

Distinctive Features: Excellent Red Maple for color and vigor

Redpointe® Red Maple, another J.Frank Schmidt Nursery introduction, combines the faster growth of Acer x freemanii with an outstanding red fall color. The foliage stays a nice dark green all season without yellowing like other red maples can do in the wrong site. The growth speed is moderate to fast and it is very tolerant of a wide range of conditions. This Red Maple has quickly become one of our favorites giving it a "Tried & True" status in our book!

Midwest Native

SGN Tried and True

GROWER'S NOTE: Redpointe® is our favorite Red Maple variety. It grows fast in our fields, but it doesn't get too "leggy". The foliage stays dark green all summer and doesn't seem to yellow like other A. rubrum varieties. We rarely have any bark splitting issues and generally bring 100% of what we plant to market quickly. The red fall color is outstanding.
