

AMELANCHIER X GRANDIFLORA 'AUTUMN BRILLIANCE'

Autumn Brilliance Serviceberry

Height: 20'
Spread: 15'
Growth Rate: Medium
Shape: Upright spreading

Foliage: Green
Fall Color: Red-orange
Flower: White clusters
Fruit: Edible purple-blue berries

Distinctive Features: Graceful spring flowers followed by edible fruits and bright fall color

The Autumn Brilliance Serviceberry is another great tree with 4 season interest, with delicate white spring flowers followed by edible red fruits in June. The tree glows in the fall with a red-orange fall color. The smooth gray branches add winter interest along with strong structure that resists ice breakage.

Midwest Native

SGN Tried and True

GROWER'S NOTE: Autumn Brilliance Serviceberry performs well in our fields. We grow both single trunk and multi-stem versions. It has a slow start as a young plant but it finishes strong. The single trunk form takes a little longer to caliper up than the multi-stem. We love how this tree has something interesting to offer in every season - especially in the summer when the berries are a nice treat in the field!
