

QUERCUS BICOLOR

Swamp White Oak

Height: 45'	Foliage: Green
Spread: 45'	Fall Color: Yellow-brown
Growth Rate: Medium	Flower: Catkins
Shape: Rounded	Fruit: 1" acorn

Distinctive Features: Beautiful in all seasons and has an interesting shaggy bark

Swamp White Oak is a beautiful native Oak with attractive textured bark and glossy green foliage. It is well adapted to poor sites and has a vigorous growth rate. This is one of our "Tried & True" favorites!

Midwest Native

SGN Tried and True

GROWER'S NOTE: This Oak responds well to pruning & staking in the nursery. Out of all of the Oaks we grow, we work on Swamp White Oaks the most. As a young tree, it requires lots of staking, un-staking, and sometimes even staking again. But in the end, it always finishes strong and results in a beautiful specimen (unless it's still being stubborn- then you just need to be a little more patient!)
