

# CLADRASTIS KENTUKEA

## Yellowwood

**Height:** 30'

**Spread:** 40'

**Growth Rate:** Medium

**Shape:** Rounded

**Foliage:** Bright green

**Fall Color:** Bright yellow

**Flower:** Fragrant white cascades

**Fruit:** 2-4" pods

**Distinctive Features:** Outstanding small tree with smooth grey bark and delicate spring flowers

Yellowwood is a pollinator loving tree with a smooth bark and large hanging clusters of fragrant white flowers. Perfect for shade in small to medium sized landscapes.

SGN Tried and True

*GROWER'S NOTE: Yellowwood starts growing slowly in our nursery. It takes some patience to get the top to fill in, but once it has a few years to establish itself the Yellowwood ends up finishing as a unique specimen. The tropical feel of the bluish-green foliage set against the smooth dark bark catches your eye in the nursery.*
