

# GYMNOCLADUS DIOICUS 'MORTON'

## *Skinny Latte Kentucky Coffee Tree*

**Height:** 50'

**Spread:** 18'

**Growth Rate:** Medium

**Shape:** Narrow vase, columnar

**Foliage:** Dark green

**Fall Color:** Yellow

**Flower:** Greenish-white

**Fruit:** Seedless

**Distinctive Features:** Chicagoland Grows selection with narrow canopy

Skinny Latte Kentucky Coffee Tree is nearly columnar. This new & stately Kentucky Coffee Tree selection was discovered at the Morton Arboretum and introduced through the Chicagoland Grows program. The seedless and narrow features of this cultivar make it worthy of consideration in the landscape!

Midwest Native

Chicagoland Grows Introduction

*GROWER'S NOTE: If you are a patient tree lover, this is your tree! It certainly is one of our favorites. As growers, good trees come to those who wait, and the Coffeetree always delivers. The ridged bark and the tropical foliage adds variety to our fields. The sparse branching at a young age presents a challenge to our growers, and it's fun to watch our rows of Coffeetrees take shape.*
